

Grow your margin without adding a single patient.

Wiz verifies therapy benefits, calculates patient estimates, and obtains authorizations, inside the EMR your clinic already uses.

THE PROBLEM WITH THE MANUAL APPROACH

Every busy morning and every new hire brings the same problem: the front-desk team does not know the complex payer rules, so they make a rough estimate of the patient's portion. Deductibles keep climbing. So does the patient's share of the bill. When the estimate is wrong at check-in, you spend months chasing the balance. Half the time, you never collect it.

THE WIZ SOLUTION

Wiz applies every payer's therapy rules automatically, so the benefits and patient estimate are correct at check-in no matter who is working the front desk.

Example shows 84 new patients per month; all figures scale with new patient volume.

WIZ PRODUCTS	MONTHLY WIZ COST	SAVINGS PER MONTH	SAVINGS PER \$1
Eligibility Verification CORE Confirms therapy-specific coverage and calculates the patient estimate before the visit.	FROM \$295	\$2,640	8.9x
Eligibility Reverification ADD-ON Rechecks priority cases and catches changed coverage before the next visit.	FROM +\$133	+\$2,479	18.7x
Prior Authorization ADD-ON Identifies requirements and deadlines, then submits, obtains, and writes back the result.	FROM +\$200	+\$1,342	6.7x

Savings come from higher payment collections, fewer denials, and staff time freed up.

Save 3x what Wiz costs, or your next three months are free.

Measured over your first three complete months of service, after a 30-day ramp-up, against your own documented pre-Wiz performance. Terms apply.

“Wiz has made our life a lot easier, we love it!”

Rachel Pitts · Financial Clearance Supervisor, Commonwealth Hand & Physical Therapy

“30% lower outstanding balances in the first month.”

Brian James · Business Manager, North Area Physical Therapy

“It takes a lot of stress and workload off your back.”

Andrea Vidana · Patient Care Coordinator, Spectrum Therapy Consultants

BUILT BY AN OPERATOR WHO WORKED THE FRONT DESK

Mansoor Ahmed, Founder & CEO. In 2018, after selling his last technology company, Mansoor bought a physical therapy clinic, became its COO, and grew it to seven locations in El Paso. He discovered that the practice was collecting only 50% of its patient balances, so he drew on his industrial engineering background and created Wiz to increase patient collections. As a result, net margin increased from 13% to 20%. The clinics were sold. Wiz stayed, and today it runs the front desk for PT, OT, and ST clinics across more than 140 locations.

HOW TO BEGIN

- 1 We configure Wiz and integrate with what you already use.
- 2 We run the pilot. Your billing staff attends one working session.
- 3 Nothing writes back to your EMR until your team approves it.
